

Feedback on the ASE Paytrack Projekt

Christoph Bräuer, Jakob Jeschke, Michael Lohwasser, Thimon Pelka, Jakob Schreiblehner, Jonas Tatzberger

As part of the Advanced Software Engineering course, we had the opportunity to collaborate with a group of computer science students who developed the PayTrack project for our Racing Team. We would like to take this opportunity to thank them for the very pleasant and successful collaboration.

Communication throughout the entire project was excellent and we were regularly updated on the project's progress and always had the opportunity to share our ideas and feedback. Our suggestions were consistently taken into account and implemented

The collaboration itself was professional and highly reliable. The students worked with great commitment and responsibility throughout the project. What stood out the most was their enthusiasm and genuine motivation. It was clear from the beginning that they truly enjoyed working on the project and genuinely cared about delivering the best possible result. Rather than simply implementing our requirements, they also contributed their own ideas and carefully considered how to make the solution as practical and useful as possible for our team.

We are very satisfied with the final outcome. The project fully meets our requirements, and we are looking forward to using the developed solution within our team in the future. Overall, the collaboration was an extremely positive experience, and we would like to sincerely thank the entire group for their dedication, professionalism, and excellent work.

On behalf of the TU Wien Racing Team,

Luzia Jeckel

Head of Financial Resources
